Just a quick note on this pattern –

I have the tree upside down in the second tree picture as I beaded it starting from the narrower end with the red and green beads and worked my way up the pattern.

Work up the pattern in an 's' type pattern – each new row starts exactly above the end of the previous row.

The gold beads for the trunk and star were added after I had beaded the main tree.

I added 5 gold beads to the top to attach an earring wire.
